

Opalescent Glass

Opalescent: Opalescent glass is made with a combination of white glass and a cathedral color. The opacity of this type of glass is in relation to the amount of white glass used in its creation. Our dense opal base glass uses a higher consistency of white glass than our light opal base glass. Because of this change in mixtures, dense opal base glass is much more opaque than our light opal base glasses.

 <p>1-D Silver yellow / with opal and/ or crystal base</p>	 <p>208 Orange cast opal in smooth or Aqua-Lite</p>	 <p>281-L Neodymium Purple and Opal</p>	 <p>565-L Grey opal swirled with dk. grey</p>
